#### Milling tools with cutting inserts

■ ALUMASTER High Speed Disc	92
■ High Speed Torus Cutter	95
■ EDGE FINISH system for work on edges	96

### TC burrs for high-performance applications

■ ALLROUND cut for versatile use	29
■ STEEL cut for steel and cast steel	35
■ INOX cut for stainless steel (INOX)	42
■ ALU cut for aluminium/non-ferrous metals	47
■ NON-FERROUS cut for non-ferrous metals	51
■ CAST cut for cast iron	52
■ TITANIUM cut for titanium	57
■ PLAST cut for GRP/CRP	60
■ FVK and FVKS cuts for GRP/CRP	60
■ TOUGH and TOUGH-S cuts for tough applications	61
■ MICRO cut for finishing work	66
■ TC burrs for flexible and defined work on edges	71

#### Drilling tools

■ HSS spiral drill	99
■ HSS step drills	107

#### Countersink tools

■ HSS countersink	111
■ HSS flat countersink	118

#### HSS hole saws, sets and accessories

■ HSS hole saws	119
■ HSS hole saw sets	120
■ Accessories	122

### TC copy milling burrs

■ Universal cut KSF 4	75
■ MICRO cut for finishing work	76

#### TC hole cutters and accessories

■ TC hole cutter	124
■ HSS pilot drill for TC hole cutters	125

### TC profile cylinder burrs

■ Profile cylinder burrs PZF	77
■ Strike plate burrs SBF	77

### Tungsten carbide burrs for high-performance applications

Tungsten carbide burrs from the high-performance line provide fast and efficient solutions.

The innovative and sophisticated system for work on surfaces includes a wide range of high-performance cuts for a variety of materials and applications.

Scan the QR code to find out more about the PFERD cuts for specific materials and applications.

#### Advantages:

- Optimum stock removal rate, high aggressiveness and good guidance.
- High economic efficiency compared with conventional burrs.
- The highly accurate concentricity enables impact-free working without creating chatter marks.
- Significant time savings.
- Also available with a high-quality HICOAT coating.

2

### Milling tools with cutting inserts

A high stock removal rate, a lower tendency to clog up and the production of large chips rather than hazardous dust are just three reasons to use milling tools when machining aluminium.

PFERD has developed innovative milling tools with cutting inserts such as the High Speed Disc ALUMASTER and the High Speed Torus Cutter for safe and efficient processing of aluminium. Whether used for milling out, work on weld seams and fillet welds or for edge and surface work, the unique milling tools are versatile and also suitable for robot-assisted applications.

Scan the QR code to find out more about PFERD tools with cutting inserts.

### HICOAT coating

PFERD offers tools with HICOAT coatings to tackle particularly demanding applications. Two different coatings are available. The HICOAT coating HC-FEP is specifically designed for iron and steel materials.

The HICOAT coating HC-NFE is mainly used for long-chipping and lubricating aluminium alloys and non-ferrous metals. In general, all PFERD tungsten carbide burrs are also available with HICOAT coatings.

Scan the QR code to find out more about PFERD's HICOAT coatings.

#### Advantages:

- Improved anti-adhesion characteristics.
- Effective chip discharge.
- Lower thermal loads.
- Increased tool life.
- Burrs with the HICOAT coating HC-FEP achieve a much higher stock removal rate than uncoated burrs.

### Custom-made products

If you cannot find the solution for your particular application in our comprehensive catalogue range, we are happy to produce milling tools to meet your wishes and requirements. Our sales representatives and technical advisers will be happy to assist you in analyzing your task. Your specifications and wishes, drawings relating to cuts, shank diameters, special lengths, special shapes and coatings can thus be taken into account.

### Resharpening

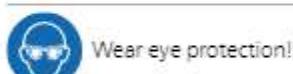

PFERD offers resharpening of tungsten carbide burrs, subject to a minimum resharpening quantity of 25 units (unmixed items). Regrinding of HSS rotary cutters or tungsten carbide burrs with a shank diameter of 3 mm is not recommended for economic reasons. In each case, our production specialists will decide whether resharpening makes sense from an economic point of view and is technically feasible. The following cuts can be resharpened (only applies to a shank diameter of 6 and 8 mm):

- Cut 1 ■ ALU
- Cut 3 ■ TITANIUM
- Cut 3 PLUS ■ TOUGH
- Cut 4 ■ TOUGH-S
- Cut 5 ■ MICRO
- INOX

### Safety notes

For safety reasons, the maximum permitted rotational speed indicated must never be exceeded.

Wear eye protection!

Wear gloves!

Wear a dust mask!

Wearing protective gloves is recommended. Handle the tool drive with both hands.

Observe the recommended rotational speed, especially when using burrs with long shanks!

Observe the contact angle of 5–60° (ALUMASTER HSD-F)!

Tighten the bolts!

Do not use if damaged!

Do not use for cutting!

CE-marked

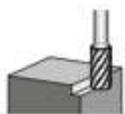

### Burr shapes

				Fine stock removal	CAST ALLROUND	3 PLUS	
Milling out, machining contours	Plastics, other materials	Thermoplastics, fibre-reinforced plastics (GRP/CRP) with a fibre content ≤ 40%		Coarse stock removal	PLAST	-	
Trimming, contour milling, cutting out holes		Thermoplastics, fibre-reinforced plastics (GRP/CRP) with a fibre content > 40%			FVK/FVKS ALU NON-FERROUS	-	

## Special applications

Application	High-performance application	Universal application
Work on edges	TC burrs for work on edges EDGE FINISH system for work on edges	- -
Problems with broken teeth	TC burrs – TOUGH, TOUGH-S cuts	HSS rotary cutters
Cutting out round holes	TC hole cutter	HSS step drills, HSS hole saws
Machining butt welds and fillet welds, work on edges/chamfering using an angle grinder	ALUMASTER High Speed Disc	-
Machining butt welds and fillet welds, work on edges	High Speed Torus Cutter	-

**PFERD cuts for universal applications**

**Cut 1 (C according to DIN 8033)**

- Machining of non-ferrous metals, steel and cast iron.
- High stock removal.

**Cut 3 (MY according to DIN 8033)**

- Machining of steel, cast iron, stainless steel (INOX), nickel-based alloys and titanium alloys.
- High stock removal.
- Good surface.

**Cut 3 PLUS (MX according to DIN 8033)**

- Similar to the 3 cut, but with cross cut.
- Machining of steel, cast iron, stainless steel (INOX), nickel-based alloys and titanium alloys.
- High stock removal.
- Burrs with the HICOAT coating HC-FEP achieve a much higher stock removal rate than uncoated burrs.

**Cut 4 (MX according to DIN 8033)**

- Machining of stainless steel (INOX), steel and high-temperature-resistant materials such as nickel-based and cobalt-based alloys.
- High stock removal with short chips.
- Good surface.

**Cut 5 (F according to DIN 8033)**

- Fine machining of steel, cast iron, stainless steel (INOX) and high-temperature-resistant materials such as nickel-based and cobalt-based alloys.
- Good surface.

**PFERD cuts for high-performance applications**

**ALLROUND cut**

- High stock removal rate on key materials such as steel, cast steel, stainless steel (INOX), non-ferrous metals and cast iron.
- Similar to the 3 PLUS cut but with a significantly higher stock removal rate.
- Burrs with the HICOAT coating HC-FEP achieve a much higher stock removal rate than uncoated burrs.

**STEEL cut**

- Extremely high stock removal rate on steel and cast steel.
- Smooth milling.
- Reduced vibration and less noise.
- Burrs with the HICOAT coating HC-FEP achieve a much higher stock removal rate than uncoated burrs.

**INOX cut**

- Extremely high stock removal rate on all austenitic, rust and acid-resistant steels, stainless steel (INOX) and soft titanium alloys (tensile strength < 500 N/mm<sup>2</sup>).
- Significantly reduced vibration and less noise.
- Burrs with the HICOAT coating HC-FEP achieve a much higher stock removal rate than uncoated burrs.

**ALU cut**

- High stock removal rate on aluminium and aluminium alloys, non-ferrous metals and plastics.
- Smooth milling.
- HICOAT coating HC-NFE for long-chipping and lubricating aluminium alloys and non-ferrous metals.

**NON-FERROUS cut**

- High stock removal rate on non-ferrous metals, brass, copper, plastics and fibre-reinforced plastics.
- Suitable for universal use.

**CAST cut**

- Extremely high stock removal rate on cast iron.
- Smooth milling.
- Reduced vibration and less noise.

**TITANIUM cut**

- Outstanding stock removal rate and tool life on hard titanium alloys.
- Tangibly more aggressive, large chips and very good chip removal.
- Reduced vibration and less noise.
- For soft titanium alloys (tensile strength < 500 N/mm<sup>2</sup>), PFERD recommends the INOX cut.

**EDGE cut**

- Creates exact edge shapes – with either 30° or 45° chamfering or a defined radius of 3.0 mm.
- Safe and comfortable to guide.

**PLAST cut**

- Trimming and contour milling of workpieces made from less hard glass and carbon-fibre-reinforced duroplastics (GRP and CRP with ≤ 40 % fibre content) and fibre-reinforced thermoplastics.
- Minimized delamination and fraying through straight cut.
- Highly suitable for use on machines and on robots.
- Reduced vibration and less noise.

**FVK cut**

- Trimming and contour milling of workpieces made from hard glass and carbon-fibre-reinforced duroplastics (also GRP and CRP > 40 %).

**FVKS cut**

- Similar to the FVK cut.
- Smooth milling.

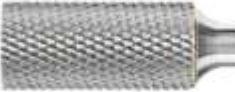

**TOUGH cut**

- High stock removal rate on cast iron, steel < 54 HRC.
- Extremely resistant to impacts.
- Also suitable for use with high surface contact angles > 1/3 and under impact loads.

**TOUGH-5 cut**

- High stock removal rate on cast iron, steel < 54 HRC.
- Similar to the TOUGH cut, but with smoother milling and shorter chips.
- Extremely resistant to impacts.
- Also suitable for use with high surface contact angles > 1/3 and under impact loads.

**MICRO cut**

- Good stock removal on almost all materials < 68 HRC.
- High surface quality.
- Reduced vibration and less noise.

**Note**

- On tungsten carbide burrs designed for high-performance applications, blue discolouration cannot be avoided on account of the very high stock removal rate. However, this does not constitute a safety risk.

## Tungsten carbide burrs with a long shank

Tungsten carbide burrs with long shanks are particularly well suited to working in hard-to-reach areas. PFERD holds long-shank versions in stock for the respective product groups. Long-shank versions are available with the 3 PLUS, STEEL, Z5 and TOUGH cuts. Additional variants can be custom-made on request. Tungsten carbide burrs with a long shank should only be used with rigid clamping systems and drives. Long-shank versions are not suitable for robotic or stationary applications. There is a risk that they may break off!

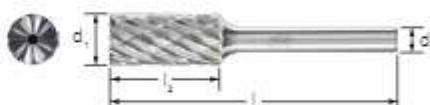

In some applications, drive spindle extensions are an economic alternative to customized burrs with long shanks.

For more information please see catalogue section 9.

**2**

## Explanation of the code system

$d_1$  = Burr dia.  
 $l_2$  = Cut length  
 $d_2$  = Shank dia.  
 $l_1$  = Total length

## Recommendations for use

An optimum rotational speed and power output for the tool drive are required for cost-effective use of tungsten carbide burrs. Using tungsten carbide burrs on drives with an elastically mounted spindle significantly improves comfort when working. What's more, the grinder's elastically mounted spindle guarantees a longer tool life, especially when using tungsten carbide burrs. Scan the QR code with your mobile device to obtain more handy recommendations for use relating to milling work.

### Recommended rotational speed range [RPM]

To determine the recommended cutting speed range [m/min], please proceed as follows:

- ① Select the material group to be machined.
- ② Determine the type of application.
- ③ Select the cut.
- ④ Establish the cutting speed range.

To determine the recommended rotational speed range [RPM], please proceed as follows:

- ⑤ Select the required burr diameter.
- ⑥ The cutting speed range and the burr diameter determine the recommended rotational speed range.

① Material group	② Used for	③ Cut	④ Cutting speed
Steel, cast steel	Steels up to 1,200 N/mm <sup>2</sup> (<38 HRC)	Coarse stock removal	1 600–900 m/min
			3 PLUS 450–600 m/min
		3 PLUS HC-FEP	450–750 m/min
	Hardened, heat-treated steels over 1,200 N/mm <sup>2</sup> (>38 HRC)	Fine stock removal	5 450–600 m/min
		Coarse stock removal	3 250–350 m/min
			4 250–450 m/min
		3 PLUS HC-FEP	250–450 m/min
Stainless steel (INOX)	Rust and acid-resistant steels	Fine stock removal	5 350–450 m/min
			1 250–450 m/min
			3 250–350 m/min
			4 250–450 m/min
		Fine stock removal	5 350–450 m/min
Non-ferrous metals	Soft non-ferrous metals	Aluminium alloys	Coarse stock removal 1 600–900 m/min
		Brass, copper, zinc	Coarse stock removal 1 600–900 m/min
		Fine stock removal	3 450–600 m/min
	Hard non-ferrous metals	Bronze, titanium/titanium alloys, hard aluminium alloys (high Si content)	Coarse stock removal 3 250–350 m/min
			4 250–350 m/min
		Fine stock removal	5 350–450 m/min
	High-temperature-resistant materials	Nickel-based and cobalt-based alloys (engine and turbine construction)	Coarse stock removal 3 PLUS 250–450 m/min
			4 250–450 m/min
		Fine stock removal	5 350–600 m/min
Cast iron	Grey cast iron, white cast iron	Coarse stock removal	1 600–900 m/min
			3 PLUS 450–600 m/min
		Fine stock removal	3 450–600 m/min

① Material group			② Used for	③ Cut	④ Cutting speed

**Tungsten carbide burrs with long shanks**

Tungsten carbide burrs with long shanks are particularly well suited to working in hard-to-reach areas. PFERD holds long-shank versions in stock for the respective product groups. Long-shank versions are available with the 3 PLUS, STEEL, Z5 and TOUGH cuts. All long shanks can be individually shortened. Tungsten carbide burrs with the designation GL 75 mm are made from solid tungsten carbide, which means they can only be shortened using diamond tools. Additional variants can be custom-made on request. In some applications, drive spindle extensions are an economic alternative to customized burrs with long shanks. For more information please see catalogue section 9.

**Safety notes:**

■ Tungsten carbide burrs with long shanks are not suitable for robotic or stationary applications. There is a risk that they may break off. Use only rigid clamping systems/drives.

■ When working with long shank lengths, it is crucial that the tool is in contact with the workpiece (or inserted in the bore or slot to be machined) before the drive system is turned on. As a rule, the tool must remain in contact with the workpiece for as long as the machine is running. Failure to observe this procedure may result in burr failure (bending) and hence an increased risk of accidents. If continuous contact between the tool and the workpiece is not guaranteed, the ⑥ maximum idling speeds stated in the table must not be exceeded.

■ For safety reasons, the maximum application speeds ⑦ with contact with the workpiece require a reduction in the recommended rotational speed of tungsten carbide burrs with standard shanks. The reduced rotational speeds are stated in the table below.

To determine the recommended rotational speed range [RPM], please proceed as follows:

① Select the required burr diameter.  
② For the maximum application speed [RPM] with contact with the workpiece, please refer to the right-hand side of the table.

**Example:**

TC burr, SL 150 mm,  
Cut 3 PLUS,  
Burr dia. 12 mm.  
Coarse stock removal on steels up to  
1,200 N/mm<sup>2</sup>.  
Maximum application speed with contact  
with the workpiece: 7,000 RPM

⑤ Burr dia. [mm]	⑥ Maximum idling speed [RPM] without contact with the workpiece		⑦ Maximum application speed [RPM] with contact with the workpiece	
	Shank length [mm]

# TC burrs for universal applications

For fine and coarse stock removal

## Cylindrical shape ZYA without end cut

Cylindrical burrs according to DIN 8032 with cut conforming to DIN 8033 for general use on all materials. A good stock removal rate is achieved through optimum matching of tungsten carbide, geometry, cut and available coating.

### Special features:

- Long tool life and high surface quality.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.
- Cut 3 PLUS is also available with the high-quality HICOAT coating for a much higher stock removal rate.

**Flame-shaped B**

Flame-shaped burr according to ISO 7755/8 with cut conforming to DIN 8033 for general use on all materials. A good stock removal rate is achieved through optimum matching of tungsten carbide, geometry, cut and available coating.

**Special features:**

- Long tool life and high surface quality.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.
- Cut 3 PLUS is also available with the high-quality HICOAT coating for a much higher stock removal rate.

### Rim shape N

Rim-shaped burr, circumferential cut is 90° and symmetric, tapered tip. The rim shape is particularly well suited to producing and processing prism-shaped keyways. A good stock removal rate is achieved through optimum matching of tungsten carbide, geometry, cut and available coating.

#### Special features:

- Long tool life and high surface quality.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

### Set 1500 cuts 3 PLUS and 5

Set 1500 – cuts 3 PLUS (shank dia. 6 mm) and 5 (shank dia. 3 mm) – contains 22 tungsten carbide burrs in the most common shapes and dimensions for general applications.

#### Contents:

The set comprises one each of the following: ZYAS 0616/6 Z3 PLUS, ZYAS 1013/6 Z3 PLUS, ZYAS 1225/6 Z3 PLUS, KUD 0605/6 Z3 PLUS, KUD 0807/6 Z3 PLUS, KUD 1210/6 Z3 PLUS, KUD 1614/6 Z3 PLUS, WRC 0616/6 Z3 PLUS, WRC 1225/6 Z3 PLUS, SPG 0618/6 Z3 PLUS, SPG 1020/6 Z3 PLUS, SPG 1225/6 Z3 PLUS, SKM 0618/6 Z3 PLUS and SKM 1020/6 Z3 PLUS, as well as one each of the following: ZYAS 0210/3 Z5,

ZYAS 0313/3 Z5, WRC 0210/3 Z5, WRC 0313/3 Z5, SPG 0307/3 Z5, RBF 0307/3 Z5, TRE 0307/3 Z5 and WKN 0307/3 Z5.

#### Special features:

- The sturdy plastic box protects the tools against dirt and damage.

## Cylindrical shape ZYAS with end cut

Cylindrical burrs according to DIN 8032 with circumferential and end cut for versatile, economical and time-saving use on steel and cast steel, stainless steel (INOX), non-ferrous metals and cast iron. Also available with wear-resistant HICOAT coating.

### Special features:

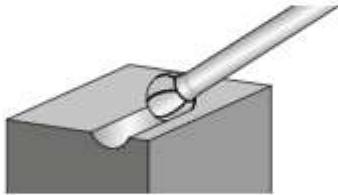

- 30% higher stock removal rate when used on steel than conventional cross-cut burrs.
- Comfortable working thanks to reduced vibration and less noise.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

## Set 1414 ALLROUND HC-FEP

Set 1414 ALLROUND HC-FEP contains three versatile tungsten carbide burrs with high-quality HICOAT coating for use on important materials such as steel and cast steel, stainless steel (INOX), non-ferrous metals and cast iron in the most common shapes and dimensions.

### Contents:

The set comprises one each of the following: ZYAS 1225/6 ALLROUND HC-FEP, WRC 1225/6 ALLROUND HC-FEP and RBF 1225/6 ALLROUND HC-FEP with a shank diameter of 6 mm, cut ALLROUND.

### Special features:

- The sturdy plastic box protects the tools against dirt and damage.

## STEEL cut for steel and cast steel

### Cylindrical shape ZYA without end cut

Cylindrical burrs according to DIN 8032 for machining steel and cast steel. Tangibly more aggressive combined with good guidance, guaranteeing safe and precise work. Also available with wear-resistant HICOAT coating.

### Special features:

- Up to 50% higher stock removal rate when used on steel and cast steel than conventional cross-cut burrs.
- Workpieces are protected through significantly lower thermal load.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

STEEL cut for steel and cast steel

## Flame-shaped B

Flame-shaped burr according to ISO 7755/8 for machining steel and cast steel. Tangibly more aggressive combined with good guidance, guaranteeing safe and precise work. Also available with wear-resistant HICOAT coating.

### Special features:

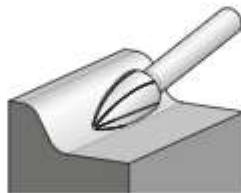

- Up to 50% higher stock removal rate when used on steel and cast steel than conventional cross-cut burrs.
- Workpieces are protected through significantly lower thermal load.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

## Pointed tree shape SPG

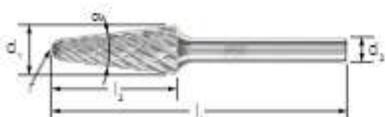

Pointed tree-shaped burr according to DIN 8032 with flattened tip for machining steel and cast steel. Tangibly more aggressive combined with good guidance, guaranteeing safe and precise work. Also available with wear-resistant HICOAT coating.

### Special features:

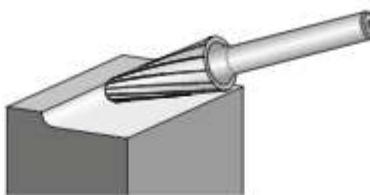

- Up to 50% higher stock removal rate when used on steel and cast steel than conventional cross-cut burrs.
- Workpieces are protected through significantly lower thermal load.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

## Conical shape with radius end KEL

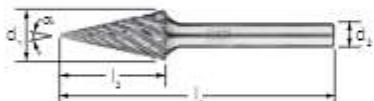

Conical burr with round radius end according to DIN 8032 for machining steel and cast steel. Tangibly more aggressive combined with good guidance, guaranteeing safe and precise work. Also available with wear-resistant HICOAT coating.

### Special features:

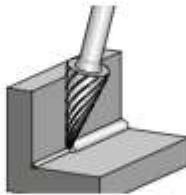

- Up to 50% higher stock removal rate when used on steel and cast steel than conventional cross-cut burrs.
- Workpieces are protected through significantly lower thermal load.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

## Set 1812 STEEL

Set 1812 STEEL contains five tungsten carbide burrs for processing steel and cast steel in the most common shapes and dimensions.

### Contents:

The set comprises one each of the following: ZYA 1225/6 STEEL, KUD 1210/6 STEEL, WRC 1225/6 STEEL, SPG 1225/6 STEEL and RBF 1225/6 STEEL with a shank diameter of 6 mm, cut STEEL.

### Special features:

- The sturdy plastic box protects the tools against dirt and damage.
- The burrs are secured at the shanks, facilitating the selection and withdrawal of the tools.
- Five further slots are available for other burrs.

# TC burrs for high-performance applications

INOX cut for stainless steel (INOX)

## Cylindrical shape ZYA without end cut

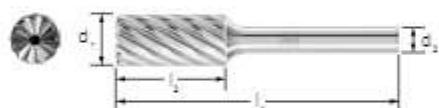

Cylindrical burrs according to DIN 8032 for machining stainless steel (INOX). The cut impresses with an extremely high stock removal rate and long tool life as well as much lower vibration than comparable cross cuts. Also available with wear-resistant HICOAT coating.

### Special features:

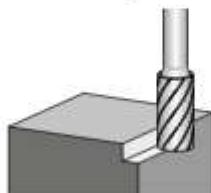

- Achieves high surface qualities through optimum chip formation.
- Prevents heat discolouration in the material due to reduced heat production.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

# TC burrs for high-performance applications

INOX cut for stainless steel (INOX)

## Flame-shaped B

Flame-shaped burr according to ISO 7755/8 for machining stainless steel (INOX). The cut impresses with an extremely high stock removal rate and long tool life as well as much lower vibration than comparable cross cuts. Also available with wear-resistant HICOAT coating.

### Special features:

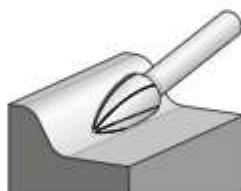

- Achieves high surface qualities through optimum chip formation.
- Prevents heat discolouration in the material due to reduced heat production.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

$d_1$ [mm]	$l_2$ [mm]	$d_2$ [mm]	$l_1$ [mm]	$r$ [mm]	Cut	Item no.	Designation	Price/ unit GBP

## Set 1912 INOX

Set 1912 INOX contains five tungsten carbide burrs for processing stainless steel (INOX) in the most common shapes and dimensions.

### Contents:

The set comprises one each of the following: ZYA 1225/6 INOX, KUD 1210/6 INOX, WRC 1225/6 INOX, RBF 1225/6 INOX and SPG 1225/6 INOX with a shank diameter of 6 mm, cut INOX.

### Special features:

- The sturdy plastic box protects the tools against dirt and damage.
- The burrs are secured at the shanks, facilitating the selection and withdrawal of the tools.
- Five further slots are available for other burrs.

## ALU cut for aluminium/non-ferrous metals

### Cylindrical shape ZYAS with end cut

Cylindrical burr according to DIN 8032 with circumferential and end cut for an extremely high stock removal rate, long tool life and smooth operation when machining aluminium.

### Special features:

- Large chips and reduced material adhesion.
- Can be used with cutting speeds of up to 1,100 m/min (HC-NFE: up to 1,300 m/min).
- HC-NFE coating prevents material adhesion when working on long-chipping and lubricating non-ferrous metals.

## CAST cut for cast iron

## Cylindrical shape ZYAS with end cut

Cylindrical burr according to DIN 8032 with circumferential and end cut for machining cast iron. The cut impresses with its smooth milling performance with considerably reduced vibration and less noise.

### Special features:

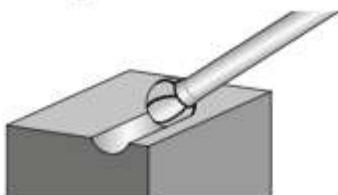

- Up to 100% higher stock removal rate on cast iron when compared with conventional cross cuts.
- Tangibly more aggressive, large chips and very good chip removal.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

### Special features:

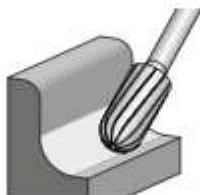

- Up to 100% higher stock removal rate on cast iron when compared with conventional cross cuts.
- Tangibly more aggressive, large chips and very good chip removal.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

CAST cut for cast iron

## Flame-shaped B

Flame-shaped burr according to ISO 7755/8 for machining cast iron. The cut impresses with its smooth milling performance with considerably reduced vibration and less noise.

### Special features:

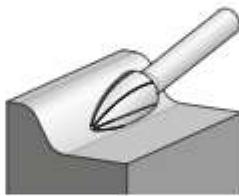

- Up to 100% higher stock removal rate on cast iron when compared with conventional cross cuts.
- Tangibly more aggressive, large chips and very good chip removal.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

PLAST cut for GRP/CRP

## Cylindrical shape ZYA

Cylindrical burr for use on less hard duroplastics (GRP and CRP ≤ 40% fibre content) and fibre-reinforced thermoplastics. The cut minimizes delamination and fraying and enables very low resistance and high feed rates.

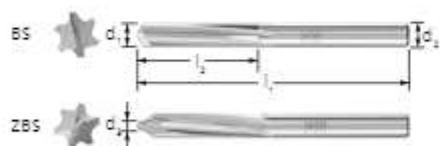

### Special features:

- Particularly suitable for use on machines and on robots.
- Drill cut BS and centre drill ZBS for combined drilling and milling work in manual, machine and robot applications.
- The versions with an end cut (STS) and flat end cut (FSTS) are suitable only for machine and robot applications.

## FVK and FVKS cuts for GRP/CRP

## Cylindrical shape ZYA

Cylindrical burr for general use on hard duroplastics (also GRP and CRP with > 40% fibre content).

### Special features:

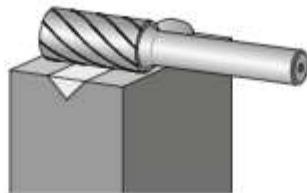

- The FVKS cut for use on machines and robots with high feed rates.
- The FVKS cut produces smooth edges and enables smooth milling.
- Drill cut BS and centre drill ZBS for combined drilling and milling work in manual, machine and robot applications.

$d_1$ [mm]	$l_1$ [mm]	$d_2$ [mm]	$l_2$ [mm]	Cut	RPM		Item no.	Designation	Price/ unit GBP

### Cylindrical shape ZYA without end cut

Cylindrical burr according to DIN 8032 for tough applications in dockyards, foundries and steel construction. The extremely impact-resistant cut minimizes tooth chipping/breakage, splintering and burr failure. Ideal for use as long-shank variants.

#### Special features:

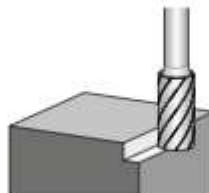

- Type TOUGH enables aggressive milling with high stock removal, whereas type TOUGH-S is characterized by smooth milling and high stock removal.
- Can also be used in low rotational speed ranges.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

Tree-shaped burr with radius end according to DIN 8032 for tough applications in dockyards, foundries and steel construction. The extremely impact-resistant cut minimizes tooth chipping/breakage, splintering and burr failure. Ideal for use as long-shank variants.

### Special features:

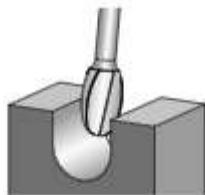

- Type TOUGH enables aggressive milling with high stock removal, whereas type TOUGH-S is characterized by smooth milling and high stock removal.
- Can also be used in low rotational speed ranges.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

### Oval shape TRE

Oval burr according to DIN 8032 for tough applications in dockyards, foundries and steel construction. The extremely impact-resistant cut minimizes tooth chipping/breakage, splintering and burr failure. Ideal for use as long-shank variants.

#### Special features:

- Type TOUGH enables aggressive milling with high stock removal.
- Can also be used in low rotational speed ranges.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

### Set 1712 TOUGH

Set 1712 TOUGH contains five tungsten carbide burrs for tough applications in the most common shapes and dimensions.

#### Contents:

The set comprises one each of the following: WRC 1225/6 TOUGH, SPG 1225/6 TOUGH, RBF 1225/6 TOUGH, KEL 1225/6 TOUGH and TRE 1220/6 TOUGH with a shank diameter of 6 mm; cut TOUGH.

#### Special features:

- Five further unused slots are available for other burrs.
- The sturdy plastic box protects the tools against dirt and damage.
- The burrs are secured at the shanks, facilitating the selection and withdrawal of the tools.

# TC burrs for high-performance applications

MICRO cut for finishing work

## Cylindrical shape ZYA without end cut

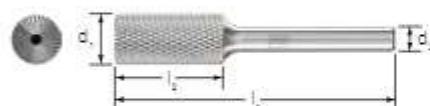

Cylindrical burr according to DIN 8032 for fine stock removal. Burrs with the MICRO cut offer a higher stock removal rate and a high surface quality compared with conventionally milled surfaces. They also operate with low vibration and little noise.

### Special features:

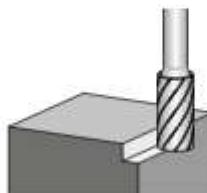

- Unlike with mounted grinding points, there is no change in geometry due to wear and tear.
- Use on almost all materials up to 68 HRC.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

## Cylindrical shape ZYAS with end cut

Cylindrical burr according to DIN 8032 with circumferential and end cut for fine stock removal. Burrs with the MICRO cut offer a higher stock removal rate and a high surface quality compared with conventionally milled surfaces. They also operate with low vibration and little noise.

### Special features:

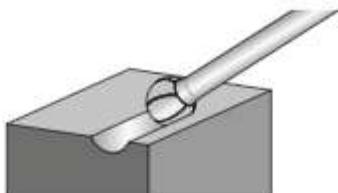

- Unlike with mounted grinding points, there is no change in geometry due to wear and tear.
- Use on almost all materials up to 68 HRC.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

## Ball shape KUD

Ball-shaped burr according to DIN 8032 for fine stock removal. Burrs with the MICRO cut offer a higher stock removal rate and a high surface quality compared with conventionally milled surfaces. They also operate with low vibration and little noise.

### Special features:

- Unlike with mounted grinding points, there is no change in geometry due to wear and tear.
- Use on almost all materials up to 68 HRC.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

# TC burrs for high-performance applications

MICRO cut for finishing work

## Pointed tree shape SPG

Pointed tree-shaped burr according to DIN 8032 with flattened tip for fine stock removal. Burrs with the MICRO cut offer a higher stock removal rate and a high surface quality compared with conventionally milled surfaces. They also operate with low vibration and little noise.

### Special features:

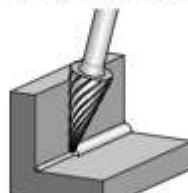

- Unlike with mounted grinding points, there is no change in geometry due to wear and tear.
- Use on almost all materials up to 68 HRC.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

### Set 1502 MICRO

Set 1502 MICRO contains ten small tungsten carbide burrs for finishing work in the most common shapes and dimensions.

#### Contents:

The set comprises one each of the following:  
 ZYA 0210/3 MICRO, ZYA 0313/3 MICRO,  
 ZYA 0613/3 MICRO, WRC 0210/3 MICRO,  
 WRC 0313/3 MICRO, WRC 0613/3 MICRO,  
 KUD 0302/3 MICRO, KUD 0605/3 MICRO,  
 RBF 0307/3 MICRO and RBF 0613/3 MICRO  
 with a shank diameter of 3 mm, cut MICRO.

#### Special features:

- The sturdy plastic box protects the tools against dirt and damage.

### Conical counterbore shape KSJ and conical counterbore shape KSJ (double-ended)

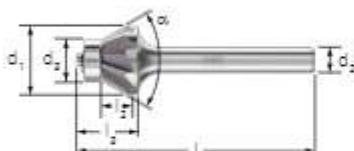

Conical counterbore burr according to DIN 8032 with cut conforming to DIN 8033, with point angle (60°). The KSJ 0605/6 (double-ended) design is cut and usable on both sides. Suitable for flexible counterboring and chamfering.

#### Special features:

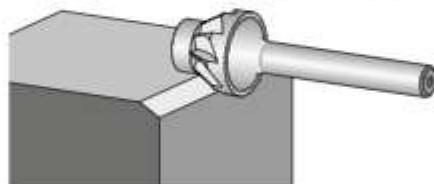

- Can be guided as desired.
- Extremely flexible for use in hard-to-reach areas.

$d_1$ [mm]	$l_2$ [mm]	$d_2$ [mm]	$l_1$ [mm]	$\alpha$ [°]	Cut	Item no.	Designation	Price/ unit GBP

### Conical counterbore shape KSJ EDGE

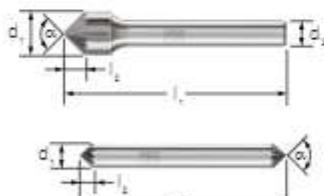

Conical counterbore burr for producing precisely defined 30° chamfer angles.

#### Special features:

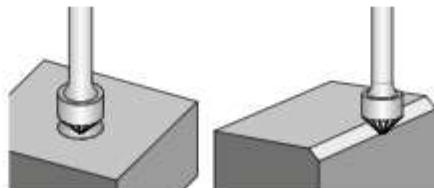

- Special design for precise guidance, without damaging the workpiece.
- Safe and comfortable to guide thanks to design with ball bearings.
- Creates exact edge shapes in one single step.

$d_1$ [mm]	$l_2$ [mm]	$d_2$ [mm]	$l_1$ [mm]	$d_2$ [mm]	$l_2$ [mm]	$\alpha$ [°]	Cut	Item no.	Designation	Price/ unit GBP

## Conical counterbore shape KSK EDGE

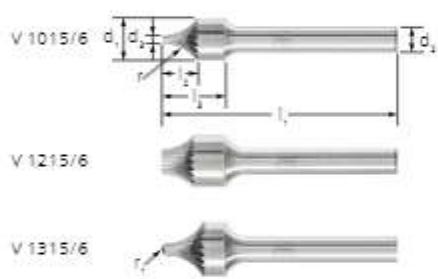

Conical counterbore burr for producing precisely defined 45° chamfer angles. The EDGE Cutting System (ECS) allows for chamfers that are 1.2 mm wide (+/- 0.2 mm). The ECS burr can be reordered and replaced. Matching burr: KSK 1603/6 EDGE (ALU) 45°.

### Special features:

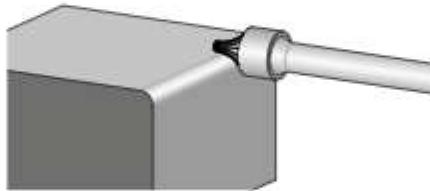

- Special design for precise guidance, without damaging the workpiece.
- Safe and comfortable to guide thanks to design with ball bearings.
- Creates exact edge shapes in one single step.

$d_1$ [mm]	$l_2$ [mm]	$d_2$ [mm]	$l_1$ [mm]	$d_3$ [mm]	$l_3$ [mm]	$d_4$ [mm]	$\alpha$ [°]	Cut	Item no.	Designation	Price/ unit GBP

## Concave radius burrs V EDGE

Concave radius burrs for the production of precise radii. Suitable for the production and processing of 3 mm outer radii. The ECS burr can be reordered and replaced. Matching burr: V 1612/6 EDGE R3,0.

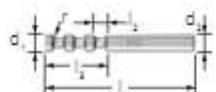

### Special features:

- Special design for precise guidance, without damaging the workpiece.
- Safe and comfortable to guide thanks to design with ball bearings.
- Creates exact edge shapes in one single step.

$d_1$ [mm]	$l_2$ [mm]	$d_2$ [mm]	$l_1$ [mm]	$d_3$ [mm]	$l_3$ [mm]	$d_4$ [mm]	$r$ [mm]	Cut	Item no.	Designation	Price/ unit GBP

### Radius burrs R

Radius burrs with a concave shape and special cut. Suitable for the production and processing of outer radii and rounded edges.

#### Special features:

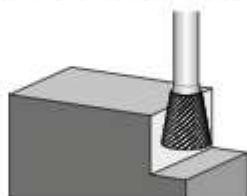

- Can be guided as desired.
- Extremely flexible for use in hard-to-reach areas.
- Available in two versions: Cylindrical with triple concave contour; or with concave shape, tapered towards shank.

$d_1$ [mm]	$l_2$ [mm]	$d_2$ [mm]	$l_1$ [mm]	$l_2$ [mm]	$r$ [mm]	Cut	Item no.	Designation	Price/ unit GBP

## Recommended rotational speed range [RPM]

To determine the recommended cutting speed range [m/min], please proceed as follows:

- ① Select the material group to be machined.
- ② Determine the type of application.
- ③ Select the cut.
- ④ Establish the cutting speed range.

To determine the recommended rotational speed range [RPM], please proceed as follows:

- ⑤ Select the required burr diameter.
- ⑥ The cutting speed range and the burr diameter determine the recommended rotational speed range.

## Cutting speeds – TC copy milling burrs

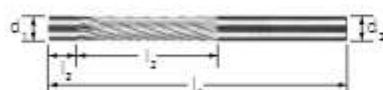

① Material group	② Used for	③ Cut	④ Cutting speed
Steel, cast steel	Steels up to 1,200 N/mm <sup>2</sup> (<38 HRC)	Coarse stock removal	4 450–600 m/min
		Fine stock removal	MICRO 600–750 m/min
	Hardened, heat-treated steels over 1,200 N/mm <sup>2</sup> (>38 HRC)	Coarse stock removal	4 250–350 m/min
		Fine stock removal	MICRO 450–600 m/min

**Example:**

TC copy milling burr,  
MICRO cut,  
burr dia. 8 mm.  
Fine stock removal on steels up to  
1,200 N/mm<sup>2</sup>.  
Cutting speed: 600–750 m/min  
Rotational speed range:  
24,000–30,000 RPM

③ Burr dia. [mm]	④ Cutting speeds [m/min]				
	250	350	450	600	750
	Rotational speeds [RPM]				
3	27,000	37,000	48,000	64,000	80,000
6	13,000	19,000	24,000	32,000	40,000
8	10,000	14,000	18,000	24,000	30,000

## Universal cut KSF 4

### Cylindrical shape ZYA without end cut

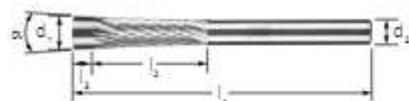

Cylindrical burr for levelling elevations such as weld seams and for repairing cutting and punching blades in tool and mould-making. The uncut area provides optimum contour guidance and protects the workpiece against damage.

**Special features:**

- Cut 4 for coarse stock removal on steel and cast steel, tool steels as well as hardened and heat-treated steels over 1,200 N/mm<sup>2</sup>.

- Long tool life and high surface quality.
- Reduced machining time.

d <sub>1</sub> [mm]	l <sub>1</sub> [mm]	l <sub>2</sub> [mm]	d <sub>2</sub> [mm]	l <sub>1</sub> [mm]	Cut	Item no.	Designation	Price/unit GBP

### Inverted cones WKN without end cut

Inverted cone-shaped burr, tapered towards the shank for work on punching tools. The uncut area provides optimum contour guidance and protects the workpiece against damage.

#### Special features:

- Cut 4 for coarse stock removal on steel and cast steel, tool steels as well as hardened and heat-treated steels over 1,200 N/mm<sup>2</sup>.

- Long tool life and high surface quality.

- Reduced machining time.

## MICRO cut for finishing work

### Cylindrical shape ZYA without end cut

Cylindrical burr for levelling elevations such as weld seams and for repairing cutting and punching blades in tool and mould-making. The uncut area provides optimum contour guidance and protects the workpiece against damage.

#### Special features:

- MICRO cut for fine stock removal on almost all materials up to a hardness of 68 HRC.

- Long tool life and high surface quality.

- Reduced machining time.

d <sub>1</sub> [mm]	l <sub>2</sub> [mm]	l <sub>1</sub> [mm]	d <sub>2</sub> [mm]	l <sub>1</sub> [mm]	Cut	Item no.	Designation	Price/unit GBP

### Cylindrical shape

Cylindrical burr with drill tip and cut cutting surfaces for time-saving milling of profile cylinders with pull protection. The integrated drill tip enables accurate centring for drilling with pinpoint precision.

#### Special features:

- Enormous time savings thanks to very high stock removal rate.
- Less susceptible to breakage, as tool jamming is minimized.
- Good tool life, optimum chip removal and easy to use.

### Strike plate burrs SBF

### Strike plate burrs SBF

Cylindrical burr with radius end according to DIN 8032 for milling strike plates (e.g. facings or security covers) in order to expose the profile cylinder behind it.

#### Special features:

- Specially developed burr geometry prevents built-up edges and tool clogging when working on particularly soft aluminium materials.

- Perfectly complements the profile cylinder burrs PZF.

$d_1$ [mm]	$l_2$ [mm]	$d_2$ [mm]	$l_1$ [mm]	Cut		Item no.	Designation	Price/ unit GBP

### Overview of cuts

#### ALU cut

- Machining of soft non-ferrous metals, brass, copper, aluminium alloys, plastics, fibre-reinforced plastics and rubber.
- Rotational speed range of 4,000 to 6,000 RPM depending on the burr diameter.

#### Cut 2 with chip breaker

- Machining of steel, cast steel and cast iron, stainless steel (INOX), non-ferrous metals and plastics.
- Rotational speed range of 1,200 to 13,200 RPM depending on the burr diameter.

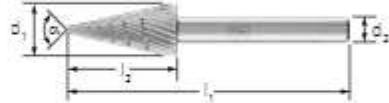

#### Cut 3 with chip breaker

- Machining of steel, cast steel and cast iron.
- Rotational speed range of 1,200 to 7,900 RPM depending on the burr diameter.

### Explanation of the code system

$d_1$	= Burr dia.
$l_2$	= Cut length
$d_3$	= Shank dia.
$l_1$	= Total length
$\alpha$	= Angle

## Recommended rotational speed range [RPM]

To determine the recommended cutting speed range [m/min], please proceed as follows:

- ① Select the material group to be machined.
- ② Determine the type of application.
- ③ Select the cut.
- ④ Establish the cutting speed range.

To determine the recommended rotational speed range [RPM], please proceed as follows:

- ⑤ Select the required burr diameter.
- ⑥ The cutting speed range and the burr diameter determine the recommended rotational speed range.

## Cutting speeds – HSS rotary cutters

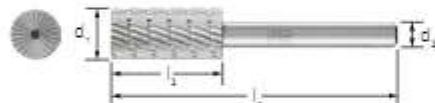

① Material group	② Used for	③ Cut	④ Cutting speed
Steel, cast steel	Construction steels, carbon steels, tool steels, non-alloyed steels, case-hardened steels, cast steel, tempering steels	Coarse stock removal	2 3 SP
		Fine stock removal	3 SP
			80–100 m/min
	Austenitic and ferritic stainless steels	Coarse stock removal	1
		Fine stock removal	1 2
			80–100 m/min 60–80 m/min
Non-ferrous metals	Aluminium alloys, brass, copper, zinc	Coarse stock removal	ALU 1
		Fine stock removal	2
Cast iron	Cast iron with flake graphite EN-GJL (GG), with nodular graphite/nodular cast iron EN-GJS (GGG), white annealed cast iron EN-GJMW (GTW), black an- nealed cast iron EN-GJMB (GTS)	Coarse stock removal	2 3 SP
		Fine stock removal	3 SP
			80–100 m/min
		Coarse stock removal	ALU 1
		Fine stock removal	1
			200–300 m/min 250–300 m/min 200–250 m/min
Plastics, other materials	Fibre-reinforced thermoplastics and duroplastics, hard rubber, wood		

**Example:**  
 HSS rotary cutter,  
 Cut 2,  
 Burr dia. 12 mm.  
 Coarse stock removal on steels up to 1,200  
 N/mm<sup>2</sup>.  
 Cutting speed: 60–80 m/min  
 Rotational speed range: 1,600–2,200 RPM

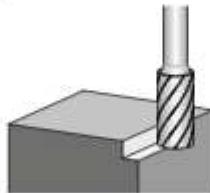

③ Burr dia. [mm]	③ Cutting speeds [m/min]					
	60	80	100	200	250	300

16.0	1,200	1,600	2,000	4,000	5,000	6,000
20.0	900	1,300	1,600	3,200	4,000	4,800

## For fine and coarse stock removal

### Cylindrical shape with end cut A-ST

The cylindrical HSS rotary cutters with end cut and special tooth geometry, manufactured to a high quality. The burrs can also be used cost-effectively with low-power tool drives at low rotational speeds.

#### Special features:

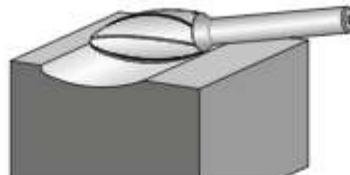

- Suitable for use on steel, cast steel, stainless steel (INOX), non-ferrous metals, cast iron and plastics.
- Highly aggressive.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

**Inverted cone with end cut W-ST**

Inverted cone-shaped burr, tapered towards the shank, with end cut and special tooth geometry, manufactured to a high quality. The burrs can also be used cost-effectively with low-power tool drives at low rotational speeds.

**Special features:**

- Suitable for use on steel, cast steel and cast iron.
- Highly aggressive.
- There is reduced wear on the tool drive due to impact-free work without chatter marks, thanks to the high concentricity.

**Set 81 HSS**

Set 81 HSS contains 10 HSS rotary cutters in the most common shapes and dimensions.

**Contents:**

The set comprises one each of the following: HSS A 0616ST/6 Z3, HSS A 1013ST/6 Z3, HSS A 1225ST/6 Z3, HSS C 0616/6 Z3, HSS C 1225/6 Z3, HSS K 0618/6 Z3, HSS K 1230/6 Z3, HSS K 1630/6 Z3, HSS F 1210/6 Z3 and HSS L 1630/6 Z3 with a shank diameter of 6 mm, cut 3.

**Special features:**

- The burrs are secured at the shanks, facilitating the selection and withdrawal of the tools.
- The sturdy plastic box protects the tools against dirt and damage.

## Set 83 HSS

Set 83 HSS contains 18 HSS rotary cutters in the most common shapes and dimensions.

### Contents:

The set comprises one each of the following: HSS A 0616ST/6 Z3, HSS A 1225ST/6 Z3, HSS C 0616/6 Z3, HSS C 1225/6 Z3, HSS K 0618/6 Z3, HSS K 1225/6 Z3, HSS K 1230/6 Z3, HSS F 0403/6 Z3, HSS F 0807/6 Z3, HSS F 1210/6 Z3, HSS F 1614/6 Z3, HSS G 0618/6 Z3, HSS G 1225/6 Z3, HSS O 0610/6 Z3, HSS O 1220/6 Z3, HSS 55/6 Z3, HSS 63/6 Z3 and HSS 64/6 Z3 with a shank diameter of 6 mm, cut 3.

### Special features:

- The sturdy plastic box protects the tools against dirt and damage.

Cut		Item no.	Designation	Price/unit GBP
<b>Shank diameter 6 mm</b>				
3	1	22900833	83 HSS	-

## Set 85 Z3

Set 85 Z3 contains three HSS rotary cutters for fine and coarse stock removal in the most common shapes and dimensions.

### Contents:

The set comprises one each of the following: A 0616ST/6 Z3, C 0616/6 Z3 and K 0618/6 Z3 with a shank diameter of 6 mm, cut 3.

### Special features:

- The sturdy plastic box protects the tools against dirt and damage.

### HSS edge trimming cutter

Due to the 3 identical cutting areas, this HSS edge trimming cutter provides three milling areas. Cylindrical rotary cutter with triple, concave contour and special cut, with a shank diameter of 6 mm. Cutting speed range of 60–80 m/min, rotational speed range of 3,100–4,200 RPM. When using the smallest burr diameter: max. 9,000 RPM.

#### Special features:

- Suitable for edge breaking to a defined radius.

### HSS rotary cutters for light metals with female thread

Multi-purpose HSS rotary cutters, similar to the tree shape. For work on soft non-ferrous metals. Cutting speed range of 200–300 m/min, rotational speed range of 3,100–4,700 RPM. For work on aluminium, up to max. 9,000 RPM.

#### Special features:

- Available in two different special cuts, with female thread M10.
- HSS 120 with chip breaker.

### Set 84 HSS

Set 84 HSS contains 15 HSS finishing cutters for fine stock removal in the most common shapes and dimensions.

#### Contents:

The set comprises one each of the following: 923, 928, 943, 946, 952, 924, 941, 944, 947, 954, 926, 942, 945, 951 and 973 with a shank diameter of 3 mm, special cut.

#### Special features:

- The tools are suitable for fine stock removal in small and hard-to-reach places.
- The sturdy plastic box protects the tools against dirt and damage.

### High Speed Disc ALUMASTER HSD-F 115/125

Type HSD-F 115/125 was developed specifically for use on angle grinders with a diameter of 115/125 mm and for flat working.

#### Matching tool drives:

Compressed-air angle grinder  
PWT 26/120 HV M14  
Electric angle grinder UWER 18/110 SI

#### Applications:

- Milling out
- Work on weld seams
- Work on fillet welds
- Work on edges/chamfering
- Surface work

### High Speed Disc ALUMASTER HSD-R 50

Due to its small design, type HSD-R 50 is very well-suited to work in hard-to-reach places and on delicate components. Thanks to its specially developed arbor, the High Speed Disc ALUMASTER HSD-R 50 can also be used on straight grinders and flexible shafts as well as angle grinders (mount dia. 10 mm).

#### Matching tool drives:

Flexible shaft drive Mammoth Electronic ME 22/240  
Compressed-air straight grinder PGAS 4/250 E-HV  
Compressed-air angle grinder PWSA 4/200 HV

#### Applications:

- Milling out
- Work on weld seams
- Work on fillet welds
- Work on edges/chamfering
- Surface work
- Milling out root seams
- Circumferential milling

### High Speed Disc ALUMASTER HSD-R 115/125

Type HSD-R 115/125 has taken the HSD-F one step further and is also suitable for applications such as peripheral milling and milling out root seams.

#### Matching tool drives:

Compressed-air angle grinder  
PWT 26/120 HV M14  
Electric angle grinder UWER 18/110 SI

#### Applications:

- Milling out
- Work on weld seams
- Work on fillet welds
- Work on edges/chamfering
- Surface work
- Milling out root seams
- Circumferential milling

### High Speed Torus Cutter HSC-T 20 RS8

Thanks to its specially developed design, the High Speed Torus Cutter HSC-T 20 is suitable for work on grooves, pockets and narrow radii and contours, particularly in robot applications. The Cutter can also be used face down and perfectly complements the ALUMASTER High Speed Disc in the HSD-R 50 version and burrs with the ALU cut.

#### Matching tool drives:

Air-powered spindle PGAS 4/280 RS  
Air-powered spindle PGAS 4/220 RS

#### Applications:

- Milling out
- Deburring
- Work on weld seams
- Work on fillet welds
- Work on edges/chamfering
- Surface work
- Circumferential milling
- Face milling
- Cleaning cast aluminium

### Selecting suitable cutting inserts

■ Uncoated cutting inserts are suitable for general use on soft non-ferrous metals (aluminium alloys, brass, copper, zinc).

■ PFERD recommends cutting inserts with the high-quality HICOAT coating for high-performance applications on soft non-ferrous metals (aluminium alloys, brass, copper, zinc), hard non-ferrous metals (hard aluminium alloys with high Si content, bronze) as well as fibre-reinforced plastics (GRP/CRP) and thermoplastics.

### ALUMASTER High Speed Disc

#### ALUMASTER HSD-R High Speed Disc

High-performance tool for peripheral milling and milling out root seams using an angle grinder. The specially developed, turnable and replaceable tungsten carbide cutting inserts enable an extremely high stock removal rate on aluminium alloys.

##### Contents:

The delivery includes the High Speed Disc ALUMASTER HSD-R 115/125 incl. pre-mounted tungsten carbide cutting inserts, a TORX wrench and a plastic box.

##### Special features:

- An extraction system is not required as no hazardous or explosive dust is generated.
- Innovative, robust cut geometry for maximum safety, extreme durability and ease of work.

D [mm]	H [mm]	U [mm]	Max. RPM		Item no.	Designation	Price/unit GBP
115	22.23	8	13,300	1	22000019	HSD-R 115/125 ALUMASTER	-

#### ALUMASTER HSD-R HICOAT High Speed Disc

High-performance tool for peripheral milling and milling out root seams using an angle grinder. The specially developed, turnable and replaceable tungsten carbide cutting inserts enable an extremely high stock removal rate on aluminium alloys.

##### Contents:

The delivery includes the High Speed Disc ALUMASTER HSD-R 115/125 HICOAT incl. pre-mounted tungsten carbide cutting inserts, a TORX wrench and a plastic box.

##### Special features:

- Cutting inserts with HICOAT coating for reduced material adhesion and a longer tool life.
- An extraction system is not required as no hazardous or explosive dust is generated.
- Innovative, robust cut geometry for maximum safety, extreme durability and ease of work.

D [mm]	H [mm]	U [mm]	Max. RPM		Item no.	Designation	Price/unit GBP
115	22.23	8	13,300	1	22000021	HSD-R 115/125 ALUMASTER HICOAT	-

#### ALUMASTER HSD-F High Speed Disc

High-performance tool for surface work with an angle grinder. The specially developed, turnable and replaceable tungsten carbide cutting inserts enable an extremely high stock removal rate on aluminium alloys.

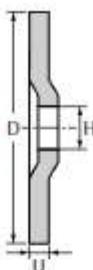

##### Contents:

The delivery includes the High Speed Disc ALUMASTER HSD-F 115/125 incl. pre-mounted tungsten carbide cutting inserts, a TORX wrench and a plastic box.

##### Special features:

- An extraction system is not required as no hazardous or explosive dust is generated.
- Innovative, robust cut geometry for maximum safety, extreme durability and ease of work.

D [mm]	H [mm]	U [mm]	Max. RPM		Item no.	Designation	Price/unit GBP
115	22.23	13	13,300	1	22000009	HSD-F 115/125 ALUMASTER	-

### ALUMASTER HSD-F HICOAT High Speed Disc

High-performance tool for surface work with an angle grinder. The specially developed, turnable and replaceable tungsten carbide cutting inserts enable an extremely high stock removal rate on aluminium alloys.

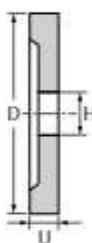

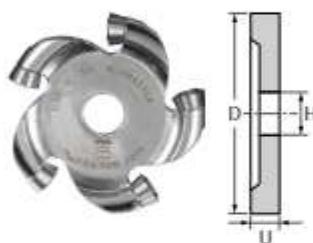

#### Contents:

The delivery includes the High Speed Disc ALUMASTER HSD-F 115/125 HICOAT incl. pre-mounted tungsten carbide cutting inserts, a TORX wrench and a plastic box.

#### Special features:

- Cutting inserts with HICOAT coating for reduced material adhesion and a longer tool life.
- An extraction system is not required as no hazardous or explosive dust is generated.
- Innovative, robust cut geometry for maximum safety, extreme durability and ease of work.

D [mm]	H [mm]	U [mm]	Max. RPM		Item no.	Designation	Price/unit GBP
115	22.23	13	13,300	1	22000012	HSD-F 115/125 ALUMASTER HICOAT	-

### High Speed Disc ALUMASTER HSD-R 50

High-performance tool for hard-to-reach areas and delicate components. The specially developed, turnable and replaceable tungsten carbide cutting inserts enable an extremely high stock removal rate on aluminium alloys. A guard is not needed (tool diameter = 49 mm).

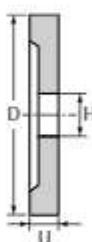

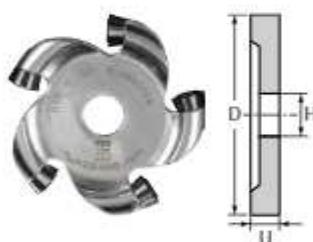

#### Contents:

The delivery includes the High Speed Disc ALUMASTER HSD-R 50 incl. pre-mounted tungsten carbide cutting inserts, a TORX wrench and a plastic box.

#### Special features:

- Can be used on angle grinders (mount dia. 10 mm), straight grinders and flexible shafts in conjunction with specially developed arbor.
- An extraction system is not required as no hazardous or explosive dust is generated.

D [mm]	H [mm]	U [mm]	Max. RPM		Item no.	Designation	Price/unit GBP
49	10	8	25,000	1	22000025	HSD-R 50 ALUMASTER	-

### High Speed Disc ALUMASTER HSD-R 50 HICOAT

High-performance tool for hard-to-reach areas and delicate components. The specially developed, turnable and replaceable tungsten carbide cutting inserts enable an extremely high stock removal rate on very challenging aluminium alloys. A guard is not needed (tool diameter = 49 mm).

#### Contents:

The delivery includes the High Speed Disc ALUMASTER HSD-R 50 HICOAT incl. pre-mounted tungsten carbide cutting inserts, a TORX wrench and a plastic box.

#### Special features:

- Can be used on angle grinders (mount dia. 10 mm), straight grinders and flexible shafts in conjunction with specially developed arbor.
- An extraction system is not required as no hazardous or explosive dust is generated.

#### Special features:

- Cutting inserts with HICOAT coating for reduced material adhesion and a longer tool life.

# Milling tools with cutting inserts

EDGE FINISH system for work on edges

## Cutting insert set with 3 mm radius, cutting insert set with chamfer

Cutting insert sets for the EDGE FINISH system for work on edges (see catalogue section 9).

### Special features:

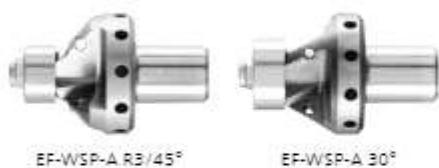

- Available as type STEEL, INOX and ALU for creating 30° and 45° chamfers.
- Radius version for steel for preparing for corrosion protection and for producing a defined radius of 3 mm.

- The best possible stock removal rate and a long tool life thanks to specially coated cutting inserts.

2

Suitable for cutting insert mounting	$\alpha$ [°]	r [mm]	Contents [Piece]	Version		Item no.	Designation	Price/unit GBP
<b>Cutting insert set with 3 mm radius</b>

### Recommended rotational speed range [RPM]

To determine the recommended cutting speed range [m/min], please proceed as follows:

- ① Select the material group to be machined.
- ② Select the type.
- ③ Establish the cutting speed range.

To determine the recommended rotational speed range [RPM], please proceed as follows:

- ④ Select the required diameter.
- ⑤ The cutting speed range and the diameter determine the recommended rotational speed range.

① Material group			② Design	③ Cutting speed
Steel, cast steel	Steels up to 700 N/mm <sup>2</sup> (< 220 HB)	Construction steels, carbon steels, tool steels, alloyed and non-alloyed steels, case-hardened steels, cast steel, tempering steels	STEEL	25–35 m/min
	Steels over 700 N/mm <sup>2</sup> (> 220 HB)		STEEL	20–25 m/min
			INOX	
Stainless steel (INOX)	Rust and acid-resistant steels	Austenitic and ferritic stainless steels	INOX	10–20 m/min
Non-ferrous metals	Soft non-ferrous metals	Aluminium alloys Brass, copper, zinc	STEEL INOX	30–60 m/min
	Hard non-ferrous metals	Bronze, titanium/titanium alloys, hard aluminium alloys (high Si content)	STEEL INOX	25–50 m/min
Cast iron	Grey cast iron, white cast iron	Cast iron with flake graphite EN-GJL (GG), with nodular graphite/nodular cast iron EN-GJS (GGG), white annealed cast iron EN-GJMW (GTW), black annealed cast iron EN-GJMB (GTS)	STEEL	10–25 m/min
			INOX	
Plastics, other materials	Fibre-reinforced thermoplastics and duroplastics, hard rubber, wood		STEEL	15–40 m/min
			INOX	

**Example:**

Spiral drill,

SPB DIN 338 HSSG N 12.0 STEEL,

Tool dia. 12 mm.

 Steels up to 700 N/mm<sup>2</sup>.

Cutting speed: 25–35 m/min

Rotational speed range: 650–950 RPM

### DIN 338 HSSG N STEEL spiral drill

High-performance drilling tools in the STEEL in HSSG (M2) version for universal industrial use on steel, aluminium, brass, bronze, cast material and plastics. Fully ground, right-hand turning version with cross grinding.

**Special features:**  
■ Long tool life and easy centring.

■ Good chip removal and high concentricity.

### DIN 338 HSSG N STEEL spiral drills, 19-piece set

The set contains 19 HSS spiral drills in the STEEL in HSSG (M2) type for industrial uses.

#### Contents:

The set consists of 19 HSS spiral drills in the STEEL in HSSG (M2) version with dia. 1.0 to 10.0 mm, in increments of 0.5 mm.

#### Special features:

- The sturdy plastic box protects the tools against dirt and damage.
- The securing of the HSS spiral drills facilitates the selection and withdrawal of the tools.

Contents [Piece]	Version		Item no.	Designation	Price/unit GBP
19	STEEL	1	25203701	SET SPB DIN 338 HSSG N 1-10 STEEL 19TLG	-

### DIN 338 HSSG N STEEL spiral drills, 25-piece set

The set contains 25 HSS spiral drills in the STEEL in HSSG (M2) type for industrial uses.

#### Contents:

The set consists of 25 HSS spiral drills with dia. 1.0 to 13.0 mm, in increments of 0.5 mm.

#### Special features:

- The sturdy plastic box protects the tools against dirt and damage.
- The securing of the HSS spiral drills facilitates the selection and withdrawal of the tools.

### DIN 338 HSSE N INOX spiral drill

High-performance drilling tools in the INOX in HSSE-Co5 (M35) version for industrial uses on tough and hard materials such as alloyed and high-strength steel and stainless steel (INOX). Fully ground, right-hand turning version with cross grinding.

#### Special features:

- Very good temperature resistance due to Co content as well as robust tip profile.
- Very long tool life and easy centring.
- Good chip removal and high concentricity.

### DIN 338 HSSE N INOX spiral drills, 19-piece set

The set contains 19 HSS spiral drills in the INOX in HSSE-Co5 (M35) type for industrial uses.

#### Contents:

The set consists of 19 HSS spiral drills with dia. 1.0 to 10.0 mm, in increments of 0.5 mm.

#### Special features:

- The sturdy plastic box protects the tools against dirt and damage.
- The securing of the HSS spiral drills facilitates the selection and withdrawal of the tools.

Contents [Piece]	Version		Item no.	Designation	Price/unit GBP
19	INOX		25203703	SET SPB DIN 338 HSSE N 1-10 INOX 19TLG	-

### DIN 338 HSSE N INOX spiral drills, 25-piece set

The set contains 25 HSS spiral drills in the INOX in HSSE-Co5 (M35) type for industrial uses.

#### Contents:

The set consists of 25 HSS spiral drills with dia. 1.0 to 13.0 mm, in increments of 0.5 mm.

#### Special features:

- The sturdy plastic box protects the tools against dirt and damage.
- The securing of the HSS spiral drills facilitates the selection and withdrawal of the tools.

25	INOX		25203704	SET SPB DIN 338 HSSE N 1-13 INOX 25TLG	-

## HSS step drills

### Recommended rotational speed range [RPM]

To determine the recommended cutting speed range [m/min], please proceed as follows:

- ① Select the material group to be machined.
- ② Select the type.
- ③ Establish the cutting speed range.

To determine the recommended rotational speed range [RPM], please proceed as follows:

- ④ Select the required diameter.
- ⑤ The cutting speed range and the diameter determine the recommended rotational speed range.

① Material group			② Design	③ Cutting speed
Steel, cast steel	Steels up to 700 N/mm <sup>2</sup>	Construction steels, carbon steels, tool steels, alloyed and non-alloyed steels, case-hardened steels, cast steel, tempering steels	HSS HICOAT HC-FEP	20–30 m/min
	Steels over 700 N/mm <sup>2</sup>		HICOAT HC-FEP	10–20 m/min
Stainless steel (INOX)	Rust and acid-resistant steels	Austenitic and ferritic stainless steels	HICOAT HC-FEP	10–20 m/min
Non-ferrous metals	Soft non-ferrous metals	Aluminium alloys, brass, copper, zinc	HSS HICOAT HC-FEP	20–30 m/min
	Hard non-ferrous metals	Bronze, titanium/titanium alloys, hard aluminium alloys (high Si content)	HICOAT HC-FEP	
Plastics, other materials	Fibre-reinforced thermoplastics and duroplastics, hard rubber, wood		HSS HICOAT HC-FEP	10–20 m/min

**Example:**

HSS step drill

STB HSS 04-30/10,

step dia. 4–30 mm.

Steels up to 700 N/mm<sup>2</sup>.

Cutting speed: 20–30 m/min

Rotational speed range: 2,400–200 RPM

④ Step dia. [mm]	③ Cutting speeds [m/min]		
	10	20	30
Rotational speeds [RPM]			
4	800	1,600	2,400
5	640	1,280	1,920
6	530	1,060	1,600
7	460	920	1,400
8	400	800	1,200
9	350	700	1,060
10	320	640	960
11	290	580	880
12	270	540	820
14	230	460	700

34	90	180	280
36	90	180	280
37	90	180	280
39	80	160	240

### HSS step drills

Very smooth-running and sturdy high-performance tools for burr-free drilling and deburring of materials measuring up to 4 mm thick in just one work step. To ensure reliable torque transmission, all step drills have a three-surface shaft.

#### Special features:

- The high-quality drill tip ensures effortless centring and drilling, and the tool taper makes it easier to pull back.
- Chips which do not break are neatly removed as with a spiral drill.
- Use HSS type with cutting oil/compressed air where possible.

### HSS step drill, 3-piece set

The set contains three HSS step drills in the versions 4–12 mm (9 steps), 4–20 mm (9 steps), 4–30 mm (14 steps) for industrial uses.

#### Special features:

- To ensure reliable torque transmission, all step drills have a three-surface shaft.
- The sturdy plastic box protects the tools against dirt and damage.
- The securing of the HSS step drills facilitates the selection and withdrawal of the tools.

### HSS step drill with HICOAT coating HC-FEP

Very smooth-running and sturdy high-performance tools for burr-free drilling and deburring of materials measuring up to 4 mm thick in just one work step. To ensure reliable torque transmission, all step drills have a three-surface shaft.

#### Special features:

- Thanks to the HICOAT coating, especially well-suited to use on stainless steel (INOX) and can be used without adding coolant.
- The high-quality drill tip ensures effortless centring and drilling, and the tool taper makes it easier to pull back.

### HSS step drill with HICOAT coating HC-FEP, 3-piece set

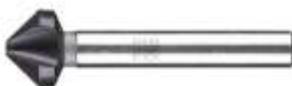

The set contains 3 HSS step drills in the versions 4–12 mm (9 steps), 4–20 mm (9 steps), 4–30 mm (14 steps) with a premium HICOAT coating HC-FEP for industrial uses.

#### Special features:

- To ensure reliable torque transmission, all step drills have a three-surface shaft.
- The sturdy plastic box protects the tools against dirt and damage.
- The securing of the HSS step drills facilitates the selection and withdrawal of the tools.

Contents [Piece]	Version		Item no.	Designation	Price/unit GBP
3	HC-FEP	1	25201047	SET STB HSS HC-FEP 3TLG	-

The range of PFERD countersinking tools comprises conical countersinks and flat countersinks of a high-quality industrial standard. PFERD also offers conical countersinks in the HSS Co5 type or with the high-quality HiCOAT coating HC-FEP for working on particularly complex materials.

**2**

### Types

#### Conical countersink

##### HSS countersink 90°

- Particularly well suited to producing countersinks for 90° screws.

##### HSS countersink 90° UGT

- Particularly well suited to producing exact countersinks.
- Smooth running.
- Low countersinking force and a good surface quality.
- Specially developed geometry with wide flutes for optimal chip removal and heat dissipation.
- Particularly well suited to robotic and stationary applications.

##### HSS countersink 60°

- Particularly well suited to countersinking and deburring.

#### Flat countersink

##### Quality grade fine (F)

- Flat countersinks with the quality grade "fine" are suitable for producing flat countersinks at through holes or blind holes in the tolerance range "fine" with high mounting accuracy.

##### Quality grade medium (M)

- Flat countersinks with the quality grade "medium" are suitable for producing flat countersinks at through holes or blind holes in the tolerance range "medium" with extended mounting accuracy.

##### For tapping hole (GKL)

- Flat countersinks for the tapping hole are suitable for producing flat countersinks at core holes for female threads.

### Recommended rotational speed range [RPM]

To determine the recommended cutting speed range [m/min], please proceed as follows:

- ① Select the material group to be machined.
- ② Select the type.
- ③ Establish the cutting speed range.

To determine the recommended rotational speed range [RPM], please proceed as follows:

- ④ Select the required diameter.
- ⑤ The cutting speed range and the diameter determine the recommended rotational speed range.

① Material group	② Design	③ Cutting speed
Steel, cast steel	Non-alloyed construction steels up to 700 N/mm <sup>2</sup>	HSSE Co5 HICOAT HC-FEP
	Alloyed construction steels over 700 N/mm <sup>2</sup>	HSSE Co5 HICOAT HC-FEP
	Construction steels, carbon steels, tool steels, non-alloyed steels, case-hardened steels, cast steel, tempering steels	HSS
Stainless steel (INOX)	Rust and acid-resistant steels	HSS HSSE Co5 HICOAT HC-FEP
	Austenitic and ferritic stainless steels	10–15 m/min
	Tool steels, tempering steels, alloyed steels, cast steel	10–15 m/min
Non-ferrous metals	Soft non-ferrous metals	HSS HSSE Co5 HICOAT HC-FEP
	Aluminium alloys Brass, copper, zinc	15–20 m/min
	Bronze, titanium/titanium alloys, hard aluminium alloys (high Si content)	10–20 m/min
Cast iron	Grey cast iron, white cast iron	HSS HSSE Co5 HICOAT HC-FEP
	Cast iron with flake graphite EN-GJL (GG), with nodular graphite/nodular cast iron EN-GJS (GGG), white annealed cast iron EN-GJMW (GTW), black annealed cast iron EN-GJMB (GTS)	10 m/min
Plastics, other materials	Fibre-reinforced thermoplastics and duroplastics, hard rubber, wood	HSS HSSE Co5 HICOAT HC-FEP
		10–15 m/min

**Example:**

Conical countersink

KES HSS DIN 335 C90°

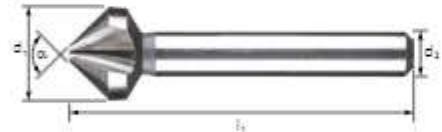

Countersink dia. 28.0 mm

 Steels up to 700 N/mm<sup>2</sup>

40.00	80	120	160

### Conical countersink HSS DIN 335 C 90°

High-performance tool with a countersink angle of 90° for countersinking 90° screws for all common materials such as steel, cast steel and non-ferrous metals. To ensure reliable torque transmission, conical countersinks have a three-surface shaft from a countersink diameter of 28 mm.

**Special features:**

- High stock removal rate and optimum chip removal.
- Burr-free results even at low cutting speeds.
- High workpiece surface quality and long tool life.

### Conical countersink sets HSS DIN 335 C 90°

The sets include high-performance countersink tools with a countersink angle of 90° for countersinking 90° screws for all common materials such as steel, cast steel and non-ferrous metals.

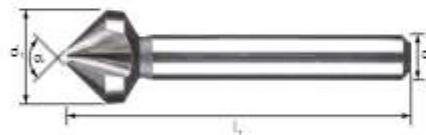

#### Special features:

- The sturdy plastic box protects the tools against dirt and damage.

### Conical countersink with unequal pitch UGT HSS DIN 335 C 90°

High-performance tool with a countersink angle of 90° for precise countersinking of 90° screws for all common materials such as steel, cast steel and non-ferrous metals. To ensure reliable torque transmission, conical countersinks have a three-surface shaft from a countersink diameter of 28 mm.

#### Special features:

- Optimum chip removal and heat dissipation, smooth running and optimum results due to unequal pitch (UGT).
- Burr-free results even at low cutting speeds.
- Low countersinking force and a good surface quality as well as a long tool life.

### Conical countersink HSSE DIN 335 C 90°, type Co5

High-performance tool with a countersink angle of 90° for countersinking 90° screws with temperature-resistant Co content for particularly tough and hard materials. To ensure reliable torque transmission, conical countersinks have a three-surface shaft from a countersink diameter of 28 mm.

#### Special features:

- High stock removal rate and optimum chip removal.
- Burr-free results even at low cutting speeds.
- High workpiece surface quality and long tool life.

### Conical countersink sets HSSE DIN 335 C 90°, type Co5

The sets include high-performance countersink tools with a countersink angle of 90° for countersinking 90° screws for particularly tough and hard materials such as alloyed and high-strength steel and stainless steel (INOX).

#### Special features:

- Long tool life and temperature-resistant version due to Co content.
- The sturdy plastic box protects the tools against dirt and damage.

### Conical countersink HSS DIN 335 C 90° with HICOAT coating HC-FEP

High-performance tool with a countersink angle of 90° for countersinking 90° screws for particularly tough and hard materials. To ensure reliable torque transmission, conical countersinks have a three-surface shaft from a countersink diameter of 28 mm.

#### Special features:

- High stock removal rate, optimum chip removal, high hardness and wear resistance thanks to HICOAT coating.
- Burr-free results even at low cutting speeds.
- High workpiece surface quality as well as particularly long tool life and high temperature resistance.

### Conical countersink sets HSS DIN 335 C 90° with HICOAT coating HC-FEP

The sets include high-performance countersink tools with a countersink angle of 90° for countersinking 90° screws for particularly tough and hard materials such as alloyed and high-strength steel and stainless steel (INOX). High hardness and wear resistance thanks to HICOAT coating.

#### Special features:

- Particularly long tool life and very temperature-resistant.
- Can also be used in a higher cutting speed range and without coolants and lubricants.
- The sturdy plastic box protects the tools against dirt and damage.

### Conical countersink HSS DIN 334 C 60°

High-performance countersink tools with a countersink angle of 60° for deburring all common materials such as steel, cast steel and non-ferrous metals.

#### Special features:

- High stock removal rate and optimum chip removal.
- Burr-free results even at low cutting speeds.
- High workpiece surface quality and long tool life.

### Recommended rotational speed range [RPM]

To determine the recommended cutting speed range [m/min], please proceed as follows:

- ① Select the material group to be machined.
- ② Select the type.
- ③ Establish the cutting speed range.

To determine the recommended rotational speed range [RPM], please proceed as follows:

- ④ Select the required diameter.
- ⑤ The cutting speed range and the diameter determine the recommended rotational speed range.

① Material group			② Design	③ Cutting speed		
Steel, cast steel	Steels up to 700 N/mm <sup>2</sup>	Construction steels, carbon steels, tool steels, alloyed and non-alloyed steels, case-hardened steels, cast steel, tempering steels	Fine (F)	10–20 m/min		
	Steels over 700 N/mm <sup>2</sup>		Medium (M)			
			Tapping hole (GKL)			
	Rust and acid-resistant steels		Fine (F)	10–15 m/min		
			Medium (M)			
			Tapping hole (GKL)			
Stainless steel (INOX)	Austenitic and ferritic stainless steels	Aluminium alloys Brass, copper, zinc	Fine (F)	10–15 m/min		
Non-ferrous metals			Medium (M)			
			Tapping hole (GKL)			
Bronze, titanium/titanium alloys, hard aluminium alloys (high Si content)			Fine (F)	15–20 m/min		
			Medium (M)			
			Tapping hole (GKL)			
Cast iron	Grey cast iron, white cast iron	Cast iron with flake graphite EN-GJL (GG), with nodular graphite/nodular cast iron EN-GJS (GGG), white annealed cast iron EN-GJMW (GTW), black an- nealed cast iron EN-GJMB (GTS)	Fine (F)	10 m/min		
Plastics, other materials			Medium (M)			
			Tapping hole (GKL)			
Fibre-reinforced thermoplastics and duroplastics, hard rubber, wood			Fine (F)	10–15 m/min		
			Medium (M)			
			Tapping hole (GKL)			

#### Example:

Flat countersink

FLS HSS DIN 373 15.0 F,  
Flat countersink dia. 15 mm.

Steels up to 700 N/mm<sup>2</sup>.

Cutting speed: 10–20 m/min.

Rotational speed range: 220–440 RPM

④ Countersink dia. [mm]	③ Cutting speeds [m/min]		
	10	15	20
	Rotational speeds [RPM]		
6.00	530	795	1,060
8.00	400	600	800
10.00	320	480	640
11.00	290	435	580
15.00	220	330	440
18.00	180	270	360
20.00	160	240	320

### HSS flat countersink DIN 373 quality grade fine for through hole

High-performance flat countersink made of HSS according to DIN 373 with the quality grade of fine for producing flat countersinks at through holes or blind holes in the tolerance range of fine with high mounting accuracy. For through holes with the quality grade fine (F) according to ISO 273.

#### Special features:

- Optimum chip removal and smooth running.

- Burr-free results and good surface quality.
- Long tool life and very high stock removal rate.

### HSS flat countersink DIN 373 quality grade medium for through hole

High-performance flat countersink made of HSS according to DIN 373 with the quality grade of medium for producing flat countersinks at through holes or blind holes in the tolerance range of medium with extended mounting accuracy. For through holes with the quality grade medium (M) according to ISO 273.

#### Special features:

- Optimum chip removal and smooth running.

- Burr-free results and good surface quality.
- Long tool life and very high stock removal rate.

### HSS flat countersink DIN 373 for thread core hole

High-performance flat countersink with guide pin for tapping hole (GKL) made of HSS according to DIN 373 for producing flat countersinks at core holes for female threads.

#### Special features:

- Optimum chip removal and smooth running.

- Burr-free results and good surface quality.
- Long tool life and very high stock removal rate.

### HSS hole saws

Hole saws made of tough, shatter-proof, sturdy HSS bimetal for cost-effectively cutting out holes. The saw teeth are made of high-quality M42 (Co8) material.

#### Special features:

- High concentricity, and chattering during sawing is prevented by the alternating tooth pitch.
- Good chip removal.
- The hole saw is conveniently centred and guided via the replaceable HSS pilot drill.

## HSS hole saw sets

### Set for tradespeople

The set contains five HSS hole saws in the most common diameters, including accessories, for use in professional trades. Operating instructions are included.

#### Contents:

The set consists of five HSS hole saws LS 22, LS 25, LS 29, LS 32 and LS 38, a hole saw arbor LSS 4, an LSA adapter for hole saw arbor LSS 4, an Allen key 4 mm and an ejection spring.

#### Special features:

- It is possible to use hole saws LS 32 and LS 38 with the LSA adapter and washer.
- Supplied in well-arranged plastic box which protects against dirt and damage.

L [mm]	B [mm]	H [mm]		Item no.	Designation	Price/unit GBP
168	116	57	1	25900700	LS-SO 7 H	-

### Set for fitters

The set contains six HSS hole saws in the most common diameters, including accessories, for plumbers and sanitary engineers. Operating instructions are included.

#### Contents:

The set consists of six HSS hole saws: LS 19, LS 22, LS 29, LS 38, LS 44 and LS 57, two hole saw arbors: LSS 2 and LSS 4, an LSA adapter for hole saw arbor LSS 4, an Allen key 4 mm and an ejection spring.

#### Special features:

- It is possible to use hole saw LS 38 with the LSA adapter and washer.
- Supplied in well-arranged plastic box which protects against dirt and damage.

### Set for electricians (international standard sizes)

The set contains six HSS hole saws in the most common international diameters, including accessories, for electricians. Operating instructions are included.

#### Contents:

The set consists of six HSS hole saws: LS 22, LS 29, LS 35, LS 44, LS 51 and LS 64, two hole saw arbors: LSS 2 and LSS 4, an LSA adapter for hole saw arbor LSS 4, an Allen key 4 mm and an ejection spring.

#### Special features:

- It is possible to use hole saw LS 35 with the LSA adapter and washer.
- Supplied in well-arranged plastic box which protects against dirt and damage.

L [mm]	B [mm]	H [mm]		Item no.	Designation	Price/unit GBP
219	156	60	1	25900910	LS-SO 9 E-1	-

### Set for electricians (German standard sizes)

The set contains nine HSS hole saws in the most common diameters, including accessories, for electricians in Germany. Operating instructions are included.

#### Contents:

The set consists of nine HSS hole saws: LS 19, LS 22, LS 25, LS 32, LS 38, LS 44, LS 51, LS 60 and LS 68, two hole saw arbors: LSS 2 and LSS 4, an LSA adapter for hole saw arbor LSS 4, a pilot drill LSB 6/90, an Allen key 4 mm and an ejection spring.

#### Special features:

- It is possible to use hole saws LS 32 and LS 38 with the LSA adapter and washer.
- Supplied in well-arranged plastic box which protects against dirt and damage.

L [mm]	B [mm]	H [mm]		Item no.	Designation	Price/unit GBP
219	156	60	1	25900010	LS-SO 13 E-2	-

### Set for mechanics

The set contains nine HSS hole saws in the most common diameters, including accessories, for mechanics in the construction, container and pipeline industries. Operating instructions are included.

#### Contents:

The set consists of nine HSS hole saws: LS 19, LS 22, LS 29, LS 35, LS 38, LS 44, LS 51, LS 57 and LS 64, two hole saw arbors: LSS 2 and LSS 4, a pilot drill LSB 6/90, an LSA adapter for hole saw arbor LSS 4, an Allen key 4 mm and an ejection spring.

#### Special features:

- It is possible to use hole saws LS 35 and LS 38 with the LSA adapter and washer.
- Supplied in well-arranged plastic box which protects against dirt and damage.

### Hole saw arbors LSS

Hole saw arbors are designed for mounting the hole saw and the pilot drill.

#### Special features:

- Hole saw arbors LSS 1 and LSS 2 are supplied with the HSS pilot drill LSB 6/60 and an ejection spring.
- The hole saw arbor LSS 4 is supplied with the HSS pilot drill LSB 6/90 and an ejection spring.

- The spring can easily be removed manually without the help of tools.

Suitable for hole saws	$d_2$ [mm]	Size [mm]	Shank type	Thread		Item no.	Designation	Price/unit GBP

LS 14-30	6.35	-	round	1/2-20 UNF	1	25200407	LSS 4	-

### Quick-mounting system for hole saws, adapters

Clamping system for easily and quickly using and changing HSS hole saws on conventional power drills. Adapter AD-PSL 14-30 for LS 14-30 mm, adapter AD-PSL 32-210 for LS 32-98 mm and adapter AD-PSL 102-210 HEAVY DUTY for LS 102-210 mm.

#### Special features:

- After the application is completed, the hole saw and quick-mounting system can be separated without the use of additional tools by simply pressing a button.
- Interchangeable HSS pilot drill.
- Due to the high torque levels involved, when using large hole saws PFERD recommends the use of the PSL quick-mounting systems in conjunction with the AD-PSL 102-210 HEAVY DUTY adapter.

Suitable for hole saws	Shank type	$d_2$ [mm]	Size [mm]		Item no.	Designation	Price/unit GBP

### HSS pilot drill LSB

HSS pilot drills for HSS hole saw arbors and quick-mounting systems for hole saws.

#### Special features:

- Hole saw arbors LSS 1 and LSS 2 are supplied with the HSS pilot drill LSB 6/60.
- The hole saw arbor LSS 4 is supplied with the HSS pilot drill LSB 6/90.
- The HSS pilot drill LSB 6/90 can be used for the quick-mounting system PSL 11.

Suitable for hole saws	Suitable shanks	$d_2$ [mm]	$l_1$ [mm]	Shank type		Item no.	Designation	Price/unit GBP

	LSS 4	6.35	90	round	1	25202007	LSB 6/90	-

### Repair set for hole saw arbors

With the repair set for hole saw arbors, the most common parts can be replaced in case of loss or damage.

#### Contents:

The repair set consists of two ejection springs, two hexagon socket head screws and an SW 4 hexagon socket wrench.

	Item no.	Designation	Price/unit GBP
1	25200515	RSL-5	-

### LSA adapter

Hole saws LS 32 to LS 38 can be used with the LSA adapter, a washer and the hole saw arbors LSS 1 and LSS 4.

Suitable for hole saws	Suitable shanks		Item no.	Designation	Price/unit GBP
LS 32-38	LSS 1, LSS 4	1	25203001	LSA	-

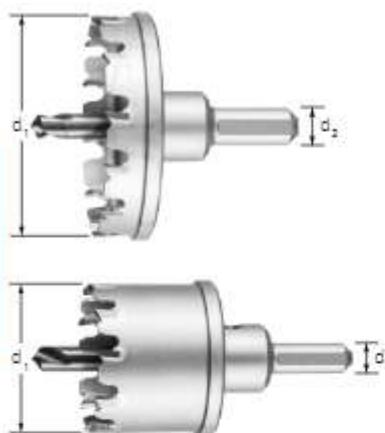

### Arbor extension for hole saws

Arbor extension SVL-300 for extending HSS hole saw arbors LSS 1 and LSS 2 to provide the necessary distance between the drive and work area.

#### Special features:

- Suitable for working on components that are difficult to access and for work on hollow walls.
- Avoids damage to the workpiece and machine.
- Dust is not drawn into the tool drive during sawing.

Suitable shanks	Shank type	Hexagon socket d, [mm]	$l_1$ , [mm]	$d_2$ , [mm]	Size [mm]		Item no.	Designation	Price/unit GBP
LSS 1, LSS 2	hexagonal	9.53	300	12.2	11	1	25200516	SVL-300	-

## TC hole cutter

Tungsten carbide hole cutter with sharp teeth made of high-quality tungsten carbide and interchangeable HSS pilot drill for quick, precise creation of cut-outs. Suitable for working on steels, stainless steel (INOX), non-ferrous metals and plastics.

## Special features:

- **Flat type:** 8 mm tool height for work on flat material (max. material thickness: 4 mm). Available diameters: 16 to 105 mm.
- **Deep type:** 35 mm tool height (max. cutting depth: 32 mm) for work on pipes and curved surfaces. Available diameters: 16 to 60 mm.
- High concentricity, as the cutting head and shank are produced in one piece.
